| <p>WHAT IS BEING PLANNED?</p> | <p>John Wayne Airport is proposing to update its general aviation facilities through a comprehensive General Aviation Improvement Program. A Draft Program Environmental Impact Report (“EIR”) has been prepared to evaluate two alternatives at an equal level of consideration. The alternatives have been identified as the Proposed Project and Alternative 1. The Proposed Project proposes a Full Service West FBO and a Full Service East FBO, for a total of two full service FBOs. Alternative 1 proposes a Full Service West FBO, a Full Service Northeast FBO, and a Full Service Southeast FBO, for a total of three full service FBOs. These FBOs under both the Proposed Project and Alternative 1 would provide facilities that would accommodate various sizes and types of general aviation aircraft and apron space. Although distinguished by the number of full service FBOs and a minor variation in aircraft storage capacity, both the Proposed Project and Alternative 1 have features in common including, but not limited to, the following elements:</p> <ul style="list-style-type: none"> • Modifications to buildings and airfield roadway to comply with current Federal Aviation Administration (“FAA”) standards for airport design (i.e., to eliminate existing non-standard conditions associated with the proximate location of existing facilities to the airfield runways and taxiways) • Opportunity for a general aviation terminal through one of the full service FBOs • Provisions for a General Aviation Facility (“GAF”) to process international arrivals • Provisions for a self-service fuel facility for general aviation aircraft • Multiple types of aircraft storage (e.g., box hangars, community hangars, T-hangars, tie-downs) | | | | | | | | | | | | |
| <p>WHY THIS AD?</p> | <p>The County of Orange has studied the effects of this Project on the environment in Draft Program Environmental Impact Report (“EIR”) 627. The Draft Program EIR has been prepared to address the potential impacts associated with the General Aviation Improvement Program and has analyzed the following topics: Aesthetics, Air Quality, Cultural/Scientific Resources, Greenhouse Gas Emissions, Hazards and Hazardous Materials, Land Use Planning, Noise, Transportation/Traffic, Tribal Cultural Resources, Utilities and Services Systems, and Water Quality. The Draft Program EIR, in conjunction with the Notice of Preparation and Initial Study (NOP/IS), scoped out the following environmental resources categories because the Project is not anticipated to have impacts on these resources: Agriculture and Forestry Resources, Biological Resources, Geology and Soils, Hydrology, Mineral Resources, Population and Housing, Public Services, Recreation.</p> <p>This notice is to advise you of the availability of Draft Program EIR 627 for your review and comment between September 20, 2018 and November 6, 2018.</p> | | | | | | | | | | | | |
