

JOHN WAYNE AIRPORT ORANGE COUNTY

FUN GUIDE

THIS BOOK BELONGS TO

JOHN WAYNE AIRPORT

Welcome! This Fun Guide was made just for you. Our Airport is a very busy and interesting place. Learn a little about the Airport – like what kind of airplanes fly here – and about the people who make John Wayne Airport a safe and special place.

We hope you enjoy this Fun Guide – and your visit to John Wayne Airport. Please come back and see us soon!

Barry A. Rondinella
Airport Director

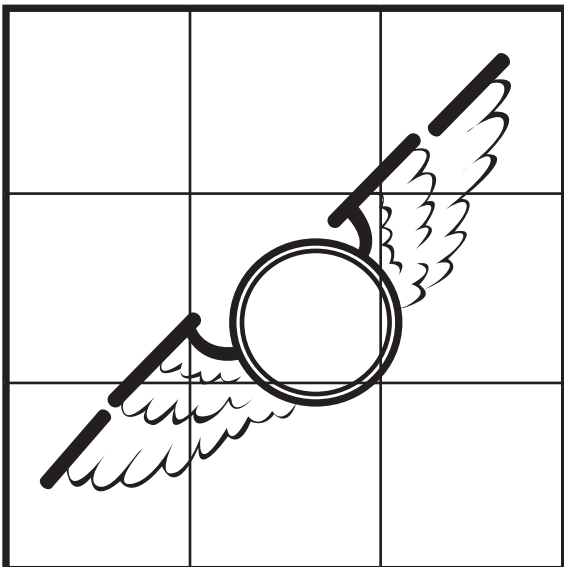

DRAWING

FUN

Draw my pilot's cap!

Draw my pilot wings!

DESTINATIONS

Draw a line from a passenger to their destination.

AERIAL MAP

405 Freeway

There's a lot happening at the Airport every day. John Wayne Airport has two runways: a 5,700-foot main runway (D) and a 2,887-foot runway (E). The main runway is used by the airlines to get you where you are going and the smaller one is for private planes that we call "general aviation."

WHAT'S IN A NAME?

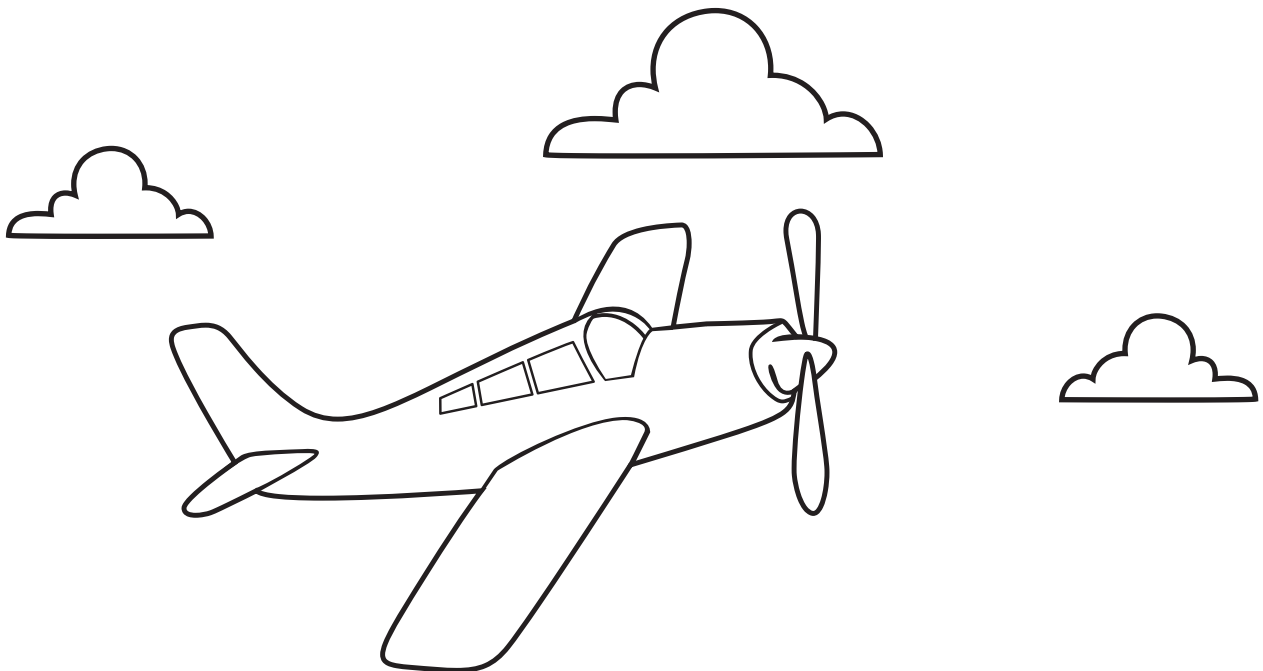

Named for one of Orange County's earliest aviation pioneers, the Airport started as "Eddie Martin Airport" in 1923. In 1941, the County of Orange built a replacement airfield nearby which became the "Orange County Airport."

In 1979, the Orange County Board of Supervisors renamed it "John Wayne Airport, Orange County" to honor the late actor and local resident.

In 1990, the Board of Supervisors named the newly constructed terminal building in honor of Fifth District Supervisor Thomas F. Riley in whose district the Airport was located.
