

Caution Wake Turbulence

Caution wake turbulence when landing on parallel runways. Maintain situational awareness of other aircraft (Category, Class, Type, Weight).

Prior to flight, remember to review the Airport/Facility Directory (AFD). John Wayne Airport has special landing and taking off procedures for Runway 20L.

“RWY 20L ARRS FLY FINAL AT 15 DEG ANGLE TO RWY; RWY 20L DEPS TURN 15 DEGS LEFT AT DEP END OF RWY”

Be attentive of all Air Traffic Controllers warning of wake turbulence and other hazards.

When in doubt, go around
