RECOMMENDED ACTION(S):

Authorize the County Procurement Officer or Deputized designee to execute Amendment Two to renew the contract for Airside Surface Maintenance with WGJ Enterprises, Inc., dba PCI, effective September 1, 2024, through August 31, 2026, in amount not to exceed \$2,800,000, for a new cumulative total amount not to exceed \$7,000,000.

SUMMARY:

Approval of a renewal to the contract for Airside Surface Maintenance will allow John Wayne Airport to ensure that the airside surfaces are maintained in a safe and serviceable condition, consistent with the Federal Aviation Administration prescribed standards and requirements.

BACKGROUND INFORMATION:

John Wayne Airport (JWA) utilizes private contractors for Airside Surface Maintenance (Services), which include, but are not limited to, airfield sweeping, power washing and cleaning, runway friction testing and rubber removal and airfield surface signage marking and removal consistent with the Federal Aviation

Administration (FAA) prescribed standards and requirements. Services will ensure that the airfield is clean and clear of debris and light rubber residue on the aircraft operational areas, designated aircraft parking locations and other airfield storage areas. Runway friction testing and rubber removal include compliance with FAA Advisory Circular publications related to skid-resistant airport pavement surfaces and airport markings. Airfield marking services include the provision of equipment to apply and remove airfield surface markings on the runways, taxiways and other aircraft accessible areas of the airfield in compliance with the FAA Advisory Circular referencing standards for airport markings. FAA-approved airfield paint and reflective media will also be provided by the vendor in compliance with airport marking criteria.

On March 3, 2021, JWA issued a Request for Proposals (RFP) for Services. An evaluation panel completed its evaluation process and recommended award of a contract for Services to PCI.

On July 27, 2021, the Board of Supervisors (Board) approved Contract MA-280-21011736 (Contract) with PCI, effective September 1, 2021, through August 31, 2024, in an amount not to exceed \$4.2 million, with the option to renew for two-additional years. On August 20, 2021, the Deputized Designee administratively approved and executed Amendment One to the Contract with PCI to reflect the contractor’s true legal name replacing all references to PCI with WGJ Enterprises, Inc., dba PCI (Contractor).

JWA is proposing to continue procuring these Services in accordance with the 2021 Contract Policy Manual Section 3.3-102. The Orange County Preference Policy is not applicable this renewal of the Contract.

Previous Request 9/1/2021 – 8/31/2024			Current Request 9/1/2024 – 8/31/2026		
Contractor	Requested Amount	Usage as of June 2024	Contractor	Requested Amount	Anticipated Usage
1	\$4.2 million	\$4,157,999	1	\$2.8 million	\$2.8 million*

*Previously approved amount does not roll over to the renewal term. Based on historical usage, entire capacity will be utilized during the renewal term.

JWA is recommending Board approval to authorize the County Procurement Officer or Deputized designee to execute Amendment Two to renew the Contract for Services with the Contractor, effective September 1, 2024, through August 31, 2026, in amount not to exceed \$2.8 million, for a new cumulative total amount not to exceed \$7 million. The requested renewal of the Contract does not expand the scope of Services to be provided by the Contractor.

The Contractor’s performance has been confirmed as satisfactory. OC Public Works has verified there are no concerns that must be addressed with respect to Contractor’s ownership/name, litigation status or conflicts with County interests. The Contractor is based in Los Angeles County.

This contract includes subcontractors. See Attachment B for information regarding the subcontractor and the Contract Summary Form.

Compliance with CEQA: The proposed project was previously determined to be Categorical Exempt from CEQA pursuant to Section 15301 (Class 1) of the CEQA Guidelines, on July 27, 2021, when it was originally approved because it involved approval of the Contract for Services that includes the operation,

repair and maintenance of existing public facilities, involving no expansion of existing or former use. The proposed project is still consistent with this determination.

FINANCIAL IMPACT:

Appropriations for this renewal are included in Fund 280, Airport Operating, FY 2024-25 Budget and will be included in the budgeting process for future years.

The Contract includes a provision stating the Contract is subject to, and contingent upon, applicable budgetary appropriations being approved by the Board for each fiscal year during the term of this Contract. If such appropriations are not approved, this Contract may be immediately terminated without penalty to the County.

* If the contracting party is a corporation, (2) two signatures are required: one (1) signature by the Chairman of the Board, the President or any Vice President; and one (1) signature by the Secretary, any Assistant Secretary, the Chief Financial Officer or any Assistant Treasurer. The signature of one person alone is sufficient to bind a corporation, as long as he or she holds corporate offices in each of the two categories described above. For County purposes, proof of such dual office holding will be satisfied by having the individual sign the instrument twice, each time indicating his or her office that qualifies under the above described provision. In the alternative, a single corporate signature is acceptable when accompanied by a corporate resolution demonstrating the legal authority of the signatory to bind the corporation.

Contractor warrants that any software as modified through services provided hereunder will not infringe upon or violate any patent, proprietary right, or trade secret right of any third party. Airfield Marking

a) Summary

This Task includes the removal of markings, touching up of markings and painting new markings.

- All marking removal and new marking must comply with the following and the current Airport Layout Plan (ALP).
- Advisory Circular 150/5340-1M (or current version) – Standards for Airport Markings
- https://www.faa.gov/airports/resources/advisory_circulars/index.cfm/go/document.current/documentnumber/150_5340-1

- https://www.faa.gov/airports/resources/advisory_circulars/index.cfm/go/document.current/documentnumber/150_5370-10

b) Approach and Talking Points

Removal of Markings –

Pavement markings that are no longer needed are not to be painted over but instead are to be physically removed. Physical removal of markings is achieved by water blasting, shot blasting, sand blasting, chemical removal, or other acceptable means that do not harm the pavement. The physical removal of any old marking(s) must include a predetermined larger size and shape of a removal area that encompasses the old marking(s) and by grouping adjacent markings together into a larger rectangular removal area. The rationale behind this practice is to eliminate the continued visual appearance of the removed marking(s).

The Contractor shall remove and dispose of paint markings as needed and upon request of the JWA PM. The exact quantities and locations are determined by the JWA PM at the start of each paint removal project. Paint in the area assigned for removal shall be 100 percent eradicated for the task to be acceptable.

Water to be used will be furnished by JWA from a central location at no cost to the Contractor. The Contractor shall furnish all equipment and labor for delivery of water from the JWA source to the job site.

The Contractor shall provide sufficient lighting for the purpose of illuminating the work area on the Airfield, and shall shade and direct the lighting as not to interfere with aircraft or tower operations.

Contractor is responsible for containing, reclaiming, cleaning and disposal of fluids, rubber, residue, waste and debris in accordance with the latest local, state and federal regulations

Pavement markings must be removed by a fully self-contained surface preparation unit equipped with a dust collector that does not generate debris and airborne dust. The unit shall be a Goff 26-D-13 blast machine equipped with an 816 dust collector shot blaster by George Fisher Disa Goffs, Inc. or approved equal.

The surface of asphalt concrete pavements subject to the pavement markings removal shall be sealed with a quick-set grade of emulsion – QS-1h or CQS-1h.

The Contractor shall provide all necessary mobilization and demobilization, labor, materials, tools, equipment with operators and supervision, to perform the Airfield marking removal at JWA.

New Marking –

MATERIALS

The Contractor shall furnish manufacturer's certified test reports for materials shipped to the project. The certified test reports shall include a statement that the materials meet the specification requirements. The reports can be used for material acceptance. All material shall arrive in sealed containers for inspection.

PAINT: Paint shall be Waterborne. Paint shall be furnished in:

White – 37925

Yellow - 33538 or 33655

Black – 37038

Red – 31136

Green - 34193

WATERBORNE

Paint shall meet the requirements of Federal Specification TT-P-1952 E, Type II.

REFLECTIVE MEDIA

Glass beads shall meet the requirements for TT-B-1325D, Type III, gradation A. Glass beads shall be treated with all compatible coupling agents recommended by the manufacturers of the paint and reflective media to ensure adhesion and embedment.

RAISED PAVEMENT MARKERS

Raised pavement markers shall be directional, retroreflective and of the color as indicated on the plans and shall conform to highway standards capable of being attached to pavement and standing up to traffic loading without becoming dislodged or disfigured and without causing damage to vehicular or aircraft tires. |

TEMPORARY FLEXIBLE PAVEMENT MARKERS

Temporary flexible raised pavement markers shall be retroreflective and of the color as indicated on the plans and shall conform to highway standards capable of being attached to

pavement and standing up to traffic loading without becoming dislodged or disfigured and without causing damage to vehicular or aircraft tires

CONSTRUCTION METHODS

WEATHER LIMITATIONS

The painting shall be performed only when the surface is dry and when the surface temperature is at least 50°F and rising and the pavement surface temperature is at least 5°F above the dew point. Markings shall not be applied when the pavement temperature is greater than 110°F. Markings shall not be applied when the wind speed exceeds 10 knots unless windscreens are used to shroud the material guns.

EQUIPMENT

All equipment for the work shall be subject to concurrence by the JWA PM and shall include the apparatus necessary to properly clean the existing surface, a mechanical marking machine, a bead dispensing machine, and such auxiliary hand-painting equipment as may be necessary to satisfactorily complete the job.

The mechanical marker shall be an atomizing spray-type-marking machine suitable for application of traffic paint. It shall produce an even and uniform film thickness at the required coverage and shall be designed so as to apply markings of uniform cross sections and clear-cut edges without running or spattering and without over spray.

PREPARATION OF SURFACE

Immediately before application of the paint, the surface shall be dry and free from dirt, grease, oil, laitance, or other foreign material which would reduce the bond between the paint and the pavement. The area to be painted shall be cleaned by sweeping and blowing or by other methods as required to remove all dirt, laitance, and loose materials without damage to the pavement surface.

Paint shall not be applied to Portland cement concrete pavement until the areas to be painted are clean of curing material. Sandblasting or high-pressure water shall be used to remove curing materials. If sandblasting is used, the Contractor shall use vacuum equipment to adequately prevent fugitive dust and debris.

LAYOUT OF MARKINGS

The proposed markings shall be laid out in advance of the paint application. The locations of markings to receive glass beads shall include permanent taxiway centerline marking, permanent taxiway edge markings, hold short lines, permanent non-movement area boundary markings, and other marking as directed by the JWA PM.

APPLICATION

Paint shall be applied at the locations, dimensions and spacing agreed to with the JWA PM and in accordance with the applicable Advisory Circular. Paint shall not be applied until the layout and condition of the surface has been approved by the JWA PM. The edges of the markings shall not vary from a straight line more than 1/2 inch in 50 feet and marking dimensions and spacing shall be within the following tolerances:

Dimension and Spacing	Tolerance
36 inches or less	±1/2 inch
greater than 36 inches to 6 feet	± 1 inch

Dimension and Spacing	Tolerance
greater than 6 feet to 60 feet	± 2 inches
greater than 60 feet	± 3 inches

The paint shall be mixed in accordance with the manufacturer's instructions and applied to the pavement with a marking machine at the rate(s) shown in Table 1. The addition of thinner will not be permitted.

TABLE 1. APPLICATION RATES FOR PAINT AND GLASS BEADS

Paint Type	Paint Square feet per gallon, ft ² /gal	Glass Beads, Type III Pounds per gallon of paint, lb/gal.
Permanent Markings	115 maximum	12 minimum

Glass beads shall be distributed upon the applicable marked areas immediately after application of the second coat of paint. A dispenser shall be furnished which is properly designed for attachment to the marking machine and suitable for dispensing glass beads. Glass beads shall be applied at the rate(s) shown in Table 1.

Glass beads shall not be applied to black paint. Glass beads shall adhere to the cured paint or all marking operations shall cease until corrections are made.

Regular monitoring of glass bead embedment should be performed.

All emptied containers shall be returned to the paint storage area for checking by the JWA PM. The containers shall not be removed from the airport or destroyed until authorized by the JWA PM.

PROTECTION

After application of the paint, all markings shall be protected from damage until the paint is dry. All surfaces shall be protected from excess moisture and/or rain and from disfiguration by spatter, splashes, spillage, or drippings of paint.

CLEANUP

The contractor shall remove from the work area all debris, waste, loose or unadhered reflective media and by-products generated by the surface preparation and application operations to the satisfaction of the JWA PM.
