

John Wayne Airport Fly Friendly Program 2025 Annual Report

2025 Program Results

This 2025 Fly Friendly report presents the fourth year of the program (January 1, 2025, through December 31, 2025). The Fly Friendly program uses robust data analysis, which includes aircraft noise monitoring system radar data and comprehensive operational data. This data highlights both General Aviation jet trends and individual operator performance for specific noise abatement analysis. It is quantified and translated into this annual report and scoring reports, then publicized to the local community, industry organizations, and operators.

The following is a list of the highest-scoring operators by the program categories for 2025; Table 1 highlights the top three performers in each scoring tier category.

Table 1: John Wayne Airport Fly Friendly Scoring Tier Categories, Highest Scoring Operators

Scoring Tier	Operators
Tier 1	<ul style="list-style-type: none"> • Baker Aviation • Wheels Up • NetJets Aviation
Tier 2	<ul style="list-style-type: none"> • Air Transport (ATI Jet) • Jet Edge • Airshare
Tier 3	<ul style="list-style-type: none"> • Charter Airlines • Sun Air Jets • BellAir
Tier 4	<ul style="list-style-type: none"> • Newport Sea Pines, LLC • Avmax Aircraft Leasing, Inc. • Mount Olive Holdings, LLC

For more information about the Fly Friendly program primary elements and scoring methodology please visit <https://www.ocair.com/about/administration/access-noise/fly-friendly/>

Results By Tier

The results are presented in four tiers divided by type of operation (Part 135 or N-Number) defined by the number of annual operations. The Fly Friendly program results for calendar year 2025 are presented in *Figures 1 – 4* for Tiers 1 through 4, respectively. In all the figures, those operators with high scoring values (“Top Scores”) are highlighted in dark green; this is a score that is 90% or better. Operators with scores between 70-89% are shown in light green which represents “Compliant Scores” and operators with scores below 70% are shown in yellow which indicates “Low Scores.”

Table 2 defines these scoring tiers.

Table 2: John Wayne Airport Fly Friendly Scoring Tier

Scoring Tier	Classification by Operator Type & Number of Annual Operations
Tier 1	<ul style="list-style-type: none">• Part 135 operators• Top 15 in annual operations
Tier 2	<ul style="list-style-type: none">• Part 135 operators• Operators ranked 16 – 30 in annual operations
Tier 3	<ul style="list-style-type: none">• Part 135 operators• Remaining Part 135 operators with at least 24 annual operations (12 arrivals and 12 departures)
Tier 4	<ul style="list-style-type: none">• N-Number operators• Operators with at least 24 annual operations (12 arrivals and 12 departures)

Tier 1 Results: Top 15 Part 135 Operators by Annual Operations

The results for the top 15 Part 135 operators defined by the number of annual operations are presented in *Figure 1*. The operator with the highest score is **Baker Aviation, scoring 86.9%**. Of the 15 operators in this tier, all but one operator scored in the Compliant Scores category.

Figure 1 – Tier 1 Results

Tier 2 Results: Top 16 – 30 Part 135 Operators by Annual Operations

The results for the Part 135 operators that were the top 16 – 30 operators defined by the number of annual operations are presented in *Figure 2*. The operator with the highest score is **Air Transport (ATI Jet)**, scoring **89.5%**, which includes a perfect score for nighttime noise reduction, a near-perfect score for minimizing high noise events, and qualification for the Plus 10 Stage 5 category for being an operator that utilizes aircraft that generates lower noise. Please note, two operators tied for number of operations within the 2025 Fly Friendly Program year. Therefore, there are 16 operators listed within Tier 2, rather than 15 operators. Air Transport (ATI Jet) and the remaining 15 operators scored in the Compliant Scores category. There were no operators in the Low Scores category.

Tier 3 Results: Remaining Part 135 Operators with 24 or more Operations

The results for the Part 135 operators that had at least 24 operations per year (12 takeoffs and 12 landings) are presented in *Figure 3*. The operator with the highest score is **Charter Airlines**, **scoring 93.2%**, which includes a perfect score for nighttime noise reduction and a perfect score for minimizing high noise events. In addition, Charter Airlines qualified for the Plus 10 Stage 5 category for being an operator that utilizes aircraft that generates lower noise. Of the 20 operators in this tier, Charter Airlines and one other operator scored in the Top Scores category and 17 operators scored in the Compliant Scores category. There was 1 operator in the Low Scores category.

Tier 4 Results: N-Number Operators with 24 or more Operations

The results for the N-number operators that had at least 24 operations per year (12 takeoffs and 12 landings) are presented in *Figure 4*. The operator with the highest score is **Newport Sea Pines, LLC, scoring 94.7%**, which includes a perfect score for nighttime noise reduction, and a near perfect score for minimizing high noise events. In addition, this operator qualified for the Plus 10 Stage 5 category for operating an aircraft that generates lower noise. Newport Sea Pines, LLC, along with 13 other operators scored in the Top Scores category, 155 operators scored in the Compliant Scores category, and all others scored in the Low Scores category. Shown below are the top 25 operators within Tier 4.

Figure 4 - Tier 4 Results (25 highest scores in this Tier)
