RECOMMENDED ACTION(S):

1. Find that the project is categorically exempt from the California Environmental Quality Act (CEQA), Class 1 (Existing Facilities) pursuant to CEQA Guidelines Section 15301.
2. Authorize the County Procurement Officer or Deputized designee to execute a contract with WGJ Enterprises, Inc. dba PCI, for Airside Surface Maintenance Services, effective November 15, 2026, through November 14, 2029, in an amount not to exceed \$4,800,000, with the option to renew for one additional two-year term.

SUMMARY:

Approval of the Contract with WGJ Enterprises, Inc. dba PCI, for Airside Surface Maintenance Services will provide John Wayne Airport with specialized services necessary to maintain airfield surfaces in a safe, operational, and compliant condition consistent with Federal Aviation Administration requirements.

BACKGROUND INFORMATION:

John Wayne Airport (JWA) utilizes private contractors to supplement County resources for Airside Surface Maintenance (Services), which consist of prescribed tasks required to maintain the airfield in accordance with applicable Federal Aviation Administration's (FAA) regulations Advisory Circulars. These Services include runway rubber removal, airfield cleaning, sweeping, pressure washing, runway friction testing, and the application of airfield surface signage and markings.

Airfield Surface Maintenance is a highly specialized program requiring personnel with training and expertise necessary to properly interpret FAA guidelines for maintaining an Airport Operating Certificate. The work requires specialized equipment, including high-pressure water-blasting and vacuum trucks, paint-stripping trucks, friction-testing machines, and large-capacity sweeping equipment. Contractors must be licensed and have a minimum of 10 years of experience performing similar services at medium or large hub airports.

JWA has historically relied on two contractors to provide Airside Surface Maintenance Services. To improve operational efficiency and lower unit costs, JWA now intends to consolidate these services into a single contract.

On July 16, 2026, JWA issued an Invitation for Bid (IFB) in accordance with Section 3.3-109 and 4.2 of the 2026 Contract Policy Manual (CPM) using the County's online bidding system to solicit bids from interested parties to provide Airside Surface Maintenance Services. Two bids were received and deemed responsive. The lowest responsive and responsible bidder, PCI, was deemed qualified to perform the necessary services in accordance with Section 4.2-110 of the 2026 CPM. The Bid Summary is included as Attachment B. No protests were received.

The Orange County Preference Policy (OCP) was applicable and incorporated into this solicitation. No OCP-qualified proposals were submitted.

JWA is procuring these Services in accordance with Section 3.3-102 of the 2026 CPM.

JWA now requests Board of Supervisors (Board) approval of the Contract with PCI for Airside Surface Maintenance Services, effective November 15, 2026, through November 14, 2029, in an amount not to exceed \$4,800,000, with the option to renew for one additional two-year term.

JWA has conducted due diligence on the contractor, and reference checks related to similar Services were satisfactory and are on file. JWA has verified there are no concerns that must be addressed with respect to contractor's ownership/name, litigation status or conflicts with County interests.

An analysis was completed to determine whether the Contract provides the County with persons specially trained, experienced, expert, and competent to perform special services in accordance with the law.

This Contract does not include subcontractors or pass through to other providers. See Attachment C for the Contract Summary Form.

COMPLIANCE WITH CEQA: The proposed project is categorically exempt (Class 1) from the provisions of CEQA pursuant to CEQA Guidelines Section 15301, because it involves maintenance and repair of existing public facilities and mechanical equipment, involving negligible or no expansion of the existing use.

FINANCIAL IMPACT:

Appropriations for this contract are included in Airport Operating Fund 280, FY 2026-27 Budget and will be included in the budgeting process for future years.

The proposed Contract includes provisions stating the Contract is subject to, and contingent upon, applicable budgetary appropriations being approved by the Board for each fiscal year during the term of this Contract. If such appropriations are not approved, this Contract may be immediately terminated without penalty to the County.

Furthermore, neither the performance of this Contract nor any portion thereof may be assigned by Contractor without the express written consent of County. Any attempt by Contractor to assign the performance or any portion thereof of this Contract without the express written consent of County shall be invalid and shall constitute a breach of this Contract.

J. **Civil Rights and Nondiscrimination:**

1. **General Civil Rights Provisions:** In all its activities within the scope of its airport program, the Contractor agrees to comply with pertinent statutes, Executive Orders, and such rules as identified in Title VI List of Pertinent Nondiscrimination Acts and Authorities to ensure that no person shall, on the grounds of race, color, national origin, creed, sex, age, or disability be excluded from participating in any activity conducted with or benefiting from Federal assistance.

This provision is in addition to that required by Title VI of the Civil Rights Act of 1964.

Contractor acknowledges that a violation of this provision shall subject Contractor to penalties pursuant to Section 1741 of the California Labor Code.
3. **Compliance with Nondiscrimination Requirements:** During the performance of this contract, the Contractor, for itself, its assignees, and successors in interest (hereinafter referred to as the "Contractor"), agrees as follows:

Contractor agrees to keep such insurance coverage current and provide a Certificate of Insurance and endorsements to the County during the entire term of this Contract.

22. **Default – Equipment, Software or Service:** In the event any equipment, software or service furnished by the Contractor in the performance of this Contract should fail to conform to the specifications therein, the County may reject same, and it shall become the duty of the Contractor to reclaim and remove the items without expense to the County and to immediately replace all such rejected equipment, software or service with others conforming to such specifications, provided that should the Contractor fail, neglect or refuse to do so, the County shall have the right to purchase on the open market a corresponding quantity of any such equipment, software or service and to deduct from any monies due or that may thereafter become due to the Contractor the difference between the price specified in this Contract and the actual cost to the County.

In the event the Contractor shall fail to make prompt delivery as specified of any equipment, software or service, the same conditions as to the rights of the County to purchase on the open market and to reimbursement set forth above shall apply, except as otherwise provided in this Contract.

In the event of the cancellation of this Contract, either in whole or in part, by reason of the default or breach by the Contractor, any loss or damage sustained by the County in procuring any equipment, software, or service which the Contractor agreed to supply under this Contract shall be borne and paid for by the Contractor.

The rights and remedies of the County provided above shall not be exclusive and are in addition to any other rights and remedies provided by law or under the Contract.

23. **Default – Reprourement Costs:** In case of Contract breach by Contractor, resulting in termination by the County, the County may procure the goods and/or services from other sources. If the cost for those goods and/or services is higher than under the terms of the existing Contract, Contractor will be responsible for paying the County the difference between the Contract cost and the price paid, and the County may deduct this cost from any unpaid balance due the Contractor. The price paid by the County shall be the prevailing market price at the time such purchase is made. This is in addition to any other remedies available under this Contract and under law.

24. **Discounts – Prompt Payment:** The County of Orange shall process payments with discounts offered for prompt payment and the checks for those payments. - A. The Contractor shall submit to the agency/department assigned Deputy Procurement Agent a written demand for a final decision regarding the disposition of any dispute between the parties arising under, related to, or involving this Contract, unless the County, on its own initiative, has already rendered such a final decision.

- B. The Contractor's written demand shall be fully supported by factual information, and, if such demand involves a cost adjustment to the Contract, the Contractor shall include with the demand a written statement signed by a senior official indicating that the demand is made in good faith, that the supporting data are accurate and complete, and that the amount requested accurately reflects the Contract adjustment for which the Contractor believes the County is liable.

Pending the final resolution of any dispute arising under, related to, or involving this Contract, the Contractor agrees to diligently proceed with the performance of this Contract, including the delivery of goods and/or provision of services. The Contractor's failure to diligently proceed shall be considered a material breach of this Contract.

Any final decision of the County shall be expressly identified as such, shall be in writing, and shall be signed by the County Deputy Procurement Agent or his designee. If the County fails to render a decision within 90 days after receipt of the Contractor's demand, it shall be deemed a final decision adverse to the Contractor's contentions. - 1) The Contractor has made false certification, or
- 2) The Contractor violates the certification by failing to carry out the requirements as noted above.

https://www.faa.gov/airports/resources/advisory_circulars/index.cfm/go/document.current/documentnumber/150_5370-10

b) Approach and Talking Points

1) Removal of Markings

Pavement markings that are no longer needed are not to be painted over but instead are to be physically removed. Physical removal of markings is achieved by water blasting, shot blasting, sand blasting, chemical removal, or other acceptable means that do not harm the pavement. The physical removal of any old marking(s) must include a predetermined larger size and shape of a removal area that encompasses the old marking(s) and by grouping adjacent markings together into a larger rectangular removal area. The rationale behind this practice is to eliminate the continued visual appearance of the removed marking(s).

The Contractor shall remove and dispose of paint markings as needed and upon request of the JWA PM. The exact quantities and locations are determined by the JWA PM at the start of each paint removal project. Paint in the area assigned for removal shall be 100 percent eradicated for the task to be acceptable.

Water to be used will be furnished by JWA from a central location at no cost to the Contractor. The Contractor shall furnish all equipment and labor for the delivery of water from the JWA source to the job site.

The Contractor shall provide sufficient lighting for the purpose of illuminating the work area on the Airfield, and shall shade and direct the lighting as not to interfere with aircraft or tower operations.

Contractor is responsible for containing, reclaiming, cleaning and disposal of fluids, rubber, residue, waste, and debris in accordance with the latest local, state, and federal regulations

Pavement markings must be removed by a fully self-contained surface preparation unit equipped with a dust collector that does not generate debris and airborne dust.

The Contractor shall provide all necessary mobilization and demobilization, labor, materials, tools, equipment with operators and supervision, to perform the Airfield marking removal at JWA.

2) Application of New Markings

MATERIALS

The Contractor shall furnish manufacturer's certified test reports for materials shipped to the project. The certified test reports shall include a statement that the materials meet the specification requirements. The reports can be used for material acceptance. All material shall arrive in sealed containers for inspection.

PAINT: Paint shall be Waterborne. Paint shall be furnished in:

White – 37925
Yellow - 33538 or 33655
Black – 37038

Paint shall meet the requirements of Federal Specification TT-P-1952 E, Type II.

REFLECTIVE MEDIA

Glass beads shall meet the requirements for TT-B-1325D, Type III, gradation A. Glass beads shall be treated with all compatible coupling agents recommended by the manufacturers of the paint and reflective media to ensure adhesion and embedment.

RAISED PAVEMENT MARKERS

Raised pavement markers shall be directional, retroreflective and of the color as indicated on the plans and shall conform to highway standards capable of being attached to pavement and standing up to traffic loading without becoming dislodged or disfigured and without causing damage to vehicular or aircraft tires. |

CONSTRUCTION METHODS

WEATHER LIMITATIONS

The painting shall be performed only when the surface is dry and when the surface temperature is at least 50°F and rising and the pavement surface temperature is at least 5°F above the dew point. Markings shall not be applied when the pavement temperature is greater than 110°F. Markings shall not be applied when the wind speed exceeds 10 knots unless windscreens are used to shroud the material guns.

EQUIPMENT

All equipment for the work shall be subject to concurrence by the JWA PM and shall include the apparatus necessary to properly clean the existing surface, a mechanical marking machine, a bead dispensing machine, and such auxiliary hand-painting equipment as may be necessary to satisfactorily complete the job.

The mechanical marker shall be an atomizing spray-type-marking machine suitable for application of traffic paint. It shall produce an even and uniform film thickness at the required coverage and shall be designed so as to apply markings of uniform cross sections and clear-cut edges without running or spattering and without over spray.

PREPARATION OF SURFACE

Immediately before application of the paint, the surface shall be dry and free from dirt, grease, oil, laitance, or other foreign material which would reduce the bond between the paint and the pavement. The area to be painted shall be cleaned by

sweeping and blowing or by other methods as required to remove all dirt, laitance, and loose materials without damage to the pavement surface.

Paint shall not be applied to Portland cement concrete pavement until the areas to be painted are clean of curing material. Sandblasting or high-pressure water shall be used to remove curing materials. If sandblasting is used, the Contractor shall use vacuum equipment to adequately prevent fugitive dust and debris.

LAYOUT OF MARKINGS

The proposed markings shall be laid out in advance of the paint application. The locations of markings to receive glass beads shall include permanent taxiway centerline marking, permanent taxiway edge markings, hold short lines, permanent non-movement area boundary markings, and other marking as directed by the JWA PM.

APPLICATION

Paint shall be applied at the locations, dimensions and spacing agreed to with the JWA PM and in accordance with the applicable Advisory Circular. Paint shall not be applied until the layout and condition of the surface has been approved by the JWA PM. The edges of the markings shall not vary from a straight line more than 1/2 inch in 50 feet and marking dimensions and spacing shall be within the following tolerances:

Dimension and Spacing	Tolerance
36 inches or less	±1/2 inch
greater than 36 inches to 6 feet	± 1 inch

Dimension and Spacing	Tolerance
greater than 6 feet to 60 feet	± 2 inches
greater than 60 feet	± 3 inches

The paint shall be mixed in accordance with the manufacturer's instructions and applied to the pavement with a marking machine at the rate(s) shown in Table 1. The addition of thinner will not be permitted.

TABLE 1. APPLICATION RATES FOR PAINT AND GLASS BEADS

Paint Type	Paint Square feet per gallon, ft²/gal	Glass Beads, Type III Pounds per gallon of paint, lb./gal.
Permanent Markings	115 maximum	12 minimum

Glass beads shall be distributed upon the applicable marked areas immediately after application of the second coat of paint. A dispenser shall be furnished which is properly designed for attachment to the marking machine and suitable for dispensing glass beads. Glass beads shall be applied at the rate(s) shown in Table 1.

Glass beads shall not be applied to black paint. Glass beads shall adhere to the cured paint or all marking operations shall cease until corrections are made.

Regular monitoring of glass bead embedment should be performed. All emptied containers shall be returned to the paint storage area for checking by the JWA PM. The containers shall not be removed from the airport or destroyed until authorized by the JWA PM.

PROTECTION

After application of the paint, all markings shall be protected from damage until the paint is dry. All surfaces shall be protected from excess moisture and/or rain and from disfiguration by spatter, splashes, spillage, or drippings of paint.

CLEANUP

The contractor shall remove from the work area all debris, waste, loose or unadhered reflective media and by-products generated by the surface preparation and application operations to the satisfaction of the JWA PM.
